C.E.O.™ Flip Vue

iPhone 3G
8GB 16GB

Executive flip-top leather case

The C.E.O. Flip Vue for iPhone 3G is a sleek, Nappa leather flip-top holster case that provides the perfect compromise between all-around protection and ease-of access. The perforated leather and contrast stitching on the front Velcro® flap make this a unique and appealing design.

In addition to the front flap protection, the iPhone is cradled securely in place by form-fitting leather that doesn't block access to any iPhone functionality, and stretchable interior elastic that provides a snug fit. Enjoy your music, or receive calls, while your C.E.O. Flip Vue is open or closed. The headphone minijack, camera, volume buttons, speaker, microphone, and dock connector are all accessible whether flip top is open or closed. The C.E.O. Flip Vue includes the Multidapt® system and a low-profile belt clip that is comfortable, convenient, interchangeable, and removable.

Features
